Iphone Photos and Computer

It uploads photos to your Dropbox account through the Dropbox App

It uploads photos to your Dropbox account through the Dropbox App

To copy photos from your phone to computer you do not need to plug it in. It is all synced Behind the scenes over Wi-Fi.

Photos you take on your phone or ipad are automatically uploaded to the computer Dropbox **folder**.

Dropbox/Camera Uploads

- This folder on your computer is just a “holding bin”. Think of these like negatives for the photos. Don’t delete them.
- You will need to copy and paste the photos into a folder in “My pictures” by date of import.
- You will then edit and organize the photos into events inside your photo program such as Photoshop Elements.

Google/Gmail Sync

This is the setup for IMAP mail. Any changes on any device will be synced to all devices. (i.e. delete an email on your phone and it is deleted from Outlook, additions etc. to calendars and contacts will show up on all three.)
